This game is just a mess and it is sad that it can even make it to Steam and dupe people out of their money!

It has to be the worst thing I have ever seen build in Unity...It is a school project at best and should not be available for sale.

It has a supposed tutorial, which only tells you what the icons are, but gives no real indication as to the games purpose and mechanics.

It is nothing enjoyable to even look at :(

Just avoid at all costs!

NOTICE: These are my opinions about the experience I had playing this game. I share them in hopes that people who are like minded will either enjoy a suggested game, or avoid frustration wasting time and money on something I felt was a personal waste. Please feel free to comment positively, but know that anything that trolls or is just simply negative comments will be quickly deleted. The reality is, that my reviews are for people who do not own the game, not to initiate philosophical dialogue about it. If you are passionate about this game, please feel free to share that in your own review.

Funny nobody every trolls or bashes a positive review on steam ;)

. This game is a great example of why Steam need a barrier for entry. This is the worst kind of quick, talentless, Unity cash grab games ever made. It's embarrassing that this is even listed as a game on steam.

Idle farming the Steam cards to sell is the only way to derive any sort of enjoyment out of this half baked pile of poo.. It was a mighty mistake ...

. Annoying music, no tutorial, bad art. It's not good. I don't even feel like writing about it. Getting a refund. Only got it because I had a coupon for it ;). Look at the trailer. It is that♥♥♥♥♥♥to play. Wayyyy to slow of a scrolling speed, no zoom option, no option to make time fly. There are so many options missing.. This game straight up sucks.

I realized that this review wasn't very helpful based on 2 people that said it wasn't, so I thought that I would update it, since this review would straight up suck if that's all I said, so here is more information that may help:

This game is for you if you like:

1. boring music
2. crappy graphics
3. not knowing what any upgrade does
4. upgrading your tower but find out it doesn't actually do any additional damage

This game just feels a bit unpolished and not even worthy of being called a Computer Science project (if that's what this is).. First of all, I don't recomand this game because it isn't good YET, it has potential, but right now, it just makes me laugh really hard.. pretty good game

I don't recommend this game because it isn't good YET, it has potential, but right now, it just makes me laugh really hard.. The game has much potential as a fun, cheap little game but there is no tutorial which is quite offputting, there is work to be done there. I would wait until the game is a tad more developed to buy it but it has potential. This tower defense game is bold and boring. Nothing makes this game fun.. Good Game to pass time :D. S C T A E R A D M S. This is the worst kind of quick, talentless, Unity cash grab games ever made.. I laughed for about 30 minutes just because of how silly your hundreds of inactive soldiers look and because of how your unit cooldown is inconsistent.. game play. just another bad gaming trying to get in some cash

DRM

Note: *If you use Windows 7 or higher, ignore this part.*

Since Valve is [planning to stop supporting the Windows XP and Windows Vista operating systems](#), I will make the DRM optional.

You will be able to launch the game without the Steam client, but, you will have the following restrictions:

- Downloadable content (DLCs), the content from the DLCs will only be available if you launch the game through Steam.
- Trading cards, you have to launch the game through Steam client to receive them, as usual, since they are a feature from Steam.
- Achievements, also works only if you start the game through Steam client.
- Updates, since the game is hosted on Steam server, without the client you will not be able to update the game anymore.

As you can see, there will be some restrictions if you run the game outside Steam, but, this is the only way to maintain the game available for you if you cannot use the client anymore.

-----//------. **Under new management:**

Hi guys!

For those who do not know, Camaquem was a group a while ago but we ended up splitting the group and it turned into 2

different publishers, Camaquem and SC Jogos.

Now, after some negotiations, SC Jogos bought back the games Call Of The Mighty Warriors and Cube Land Arena and I will continue to develop those games for now on.

So, stay tuned because soon we will have some new stuff for the games. Any ideas and/or suggestions are always welcome!

. DLCs will be removed from the store.:

Hello guys, I'm here to announce that I have decided to remove all the DLCs from the store. If you already own one or more DLCs the content from these DLCs will continue to be available for you.

After 2 years of feedback from the players (mostly negative) about the DLCs and after some considerations I have decided to remove it permanently from the store.

The following games will be affected:

Andarilho: V.2019.1.0:

New version with some bug fixes, improvements, levels more balanced and achievements.. **New enemies:**

Dear Warriors, we have released today a small update which includes a range of new enemies (knights). Since the game does not have too much different enemies we are launching this update today, we hope you enjoy it. Stay tuned to further releases.
